

ENERGY IN MOHAVE COUNTY

From natural gas to biomass and from wind to solar, the energy industry in Mohave County is growing and thriving. And with our professional workforce, business-friendly government and sunny climate—it makes sense.

Move your business to Mohave County and discover benefits like:

- Available land zoned for wind and solar
- A professional and experienced workforce
- Easy access to suppliers in California
- Low business costs and some of the lowest taxes in Arizona
- 300+ days of sunshine and perfect conditions for wind farms
- Programs that make it easy to connect with suppliers, businesses and workforce in the Mohave County area
- A backdrop of vast blue skies, desert landscapes, over 1,000 miles of freshwater coast and the breathtaking Grand Canyon west

SUCCESS STORIES

Mohave County

"Mohave County has been an excellent partner for SOLON Corporation. Their support for the renewable energy industry has provided us a success path for the deployment of our project."

- Robert T. Wanless
Business Development Manager
SOLON Corporation

"Mohave County proved to be a perfect fit for us. The permitting process was fair, the government employees were very helpful and responsive. And we found very eager and professional workers to help build the wind project. The citizens believe that the county can be a hub for the renewable energy sector, and are primed to get a piece of it."

- Mike Boyd
Executive Vice President/Development
Western Wind Energy Corp.
